### How Does Video Instruction Work?

Videotape your child’s performance.

E-mail your video to us. We will review and critique it utilizing our state-of-the-art editing software.

Move the footage over to your computer as you would any video you record.

We will then up-load a video lesson back to you, a fully edited film of what your child does right, wrong and how to fix it. Your instruction will contain an edited analysis with personalized audio comments, instructional videos, still shots and corrective drills.

Create a video library of all your lessons so that you can go back later and review your performance on your own time to keep your skills sharp!
